NEXT GENERATION WINDOW TINT

## SMART AND STYLISH IN 4 DIFFERENT SHADES

---

### EXCELLENT HEAT REJECTION

At Eclipse, we have tried and tested multiple brands of films and have specifically chosen to carry Llumar Auto Film for over 30 years. They are a highly reputable brand of film providing excellent quality and craftsmanship.

Llumar's Ceramic series is the most technologically advanced tint on the market. This film contains ceramic particles that are nonmetallic, maximizing reflection and reduction of solar heat and UV rays from entering your vehicle. The ceramic film absorbs twice as much heat as dyed film and will never fade.

While Ceramic film reflects and absorbs high level of light, it also resists glare and fading and are highly shatter-proof.

## PRECISION CUT

With the advancement of technology and LLumar's proprietary PrecisionCut Software, all of our films are cut custom to the specific vehicle, year, and model.

99% of vehicles tint installations now require no panels removed and no knife contact to the glass. Keeping the installation process clean and damage free.

## Did you know?

Window Film is recommended as a part of a comprehensive sun protection program! The UV Protective Layer on the tint reduces 99% of harmful UV rays.
